Aryan Dani

AI Engineer & Full-Stack Developer

Email: daniaryan212@gmail.com • Phone: +91 86682 05450

Portfolio: www.aryandani.com

GitHub: github.com/aryan-dani • LinkedIn: linkedin.com/in/aryandani

Professional Summary

AI engineer and full-stack developer shipping agentic systems, computer vision, and production web apps. Currently an AI/ML intern at **ProvaanTech**; previously healthcare AI at Artem HealthTech and autonomous systems at MIT-WPU. Strong in Python, TypeScript/JavaScript, LangGraph, RAG, and React/Next.js — with live demos employers can open on aryandani.com.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript (ES6+), Java, C, HTML5, CSS3, SASS/SCSS
- **AI / ML:** LangGraph, RAG, LLMs, MCP, Prompt Engineering, PyTorch, TensorFlow, OpenCV, MediaPipe, YOLO, Scikit-learn, Ollama, Chroma, Groq, Gemini
- **Web:** React, Next.js, Vite, Angular, Node.js, Express.js, FastAPI, Tailwind, WebSockets, REST
- **Data & Infra:** Supabase, Firebase, MongoDB, PostgreSQL/SQLite, Docker, Git/GitHub, Vercel, GitHub Actions, Linux/Unix
- **Data & Visualization:** Pandas, NumPy, Matplotlib, Power BI
- **Concepts:** Generative AI, Computer Vision, Object Detection, NLP, CNNs, MLOps, Agile/Scrum, HITL agents

Experience

AI/ML Intern | *ProvaanTech* June 2026 – Present

Remote

- Working on live client and product AI/ML problems from day one under mentor guidance.
- Applied-research cadence: experimentation and production-oriented implementation under real product constraints.

Autonomous Systems Lead / ML Developer | *MIT-WPU (AI Capstone Dev)* June – Dec 2025

Pune, India

- Led multi-modal **threat detection** (YOLOv11 + EfficientNetV2) for video and X-ray; research reports mAP@0.5 of **0.960**.
- Built **PosePro** (MediaPipe) with form feedback under **25 ms** for live coaching loops.
- Designed **Arbiter**, a LangGraph + Gemini CI healer running in Docker sandboxes with FastAPI/SSE streaming for live tool traces.

AI Engineer Intern | *Artem HealthTech Pvt. Ltd.* Jan – May 2025

Pune, India

- Built a DICOM assist pipeline (CNNs/VLMs) to classify slices and describe anomalies for radiologist workflows.
- Delivered low-latency speech-to-text logging (Angular + WebSockets); helped improve inference responsiveness ∼30%.

Education

MIT World Peace University, Pune, India 2022 – Present

B.Tech Computer Science — AI & Data Science **CGPA: 9.25 / 10**

- Consistently top-tier academic performance across AI, systems, and full-stack coursework.
- Google Student Ambassador (Dec 2025); Student Placement Representative coordinating placement ops and industry events.

- First author, *Real-Time Multi-Modal Threat Detection* (YOLOv11 + EfficientNetV2).
- Relevant coursework: Data Structures, Algorithms, Machine Learning, Computer Vision, Full-Stack Development.

Lexicon International School, Pune, India 2015 – 2022
High School — Science Stream (PCM + Computer Science) **Class 10: 93%**

- Strong foundation in mathematics, science, and analytical problem-solving.
- Core focus: Physics, Chemistry, Mathematics, and Computer Science fundamentals.

Selected Projects

Utility — Academic OS with RAG | *Next.js, Supabase, TypeScript, RAG* `utilityos.tech`

- Academic operating system with parallel document indexing, auth/storage, and study tools — live on Vercel.
- RAG-powered document intelligence so students can query notes and materials in context.

Swiggy Nexus — HITL Agent over MCP | *LangGraph, MCP, FastAPI, Next.js, Groq* `Live demo`

- Planner/Executor agent across Food, Instamart, and Dineout domains (independent POC, not affiliated with Swiggy).
- Every write action blocks until human approval — true HITL control over agent side effects.

The Shadow Instructor — Dual-Agent Interviews | *Gemini, Next.js, FastAPI, WebSockets* `Live demo`

- Flash interviewer for low-latency dialogue paired with a Pro shadow coach for accuracy, communication, and confidence.
- Real-time dual-agent loop designed to feel like a real mock interview, not a chat toy.

Arbiter (RIFT 2026) — Autonomous CI Healing | *Gemini, LangGraph, FastAPI, Docker* `Live demo`

- Multi-agent sandbox that isolates repo failures and proposes fixes through a discover/test/debug/git state machine.
- Built for RIFT 2026 — production-shaped agent workflow, not a notebook demo.

Prism — Offline RBAC RAG Agent | *Ollama, Chroma, FastAPI, React* `github.com/aryan-dani/Prism`

- Role-gated retrieval across enterprise domains; refuses weak answers and exports one grounded result in multiple formats.
- Fully offline-capable stack for privacy-sensitive document Q&A.

Threat Detection System | *Python, YOLOv11, EfficientNetV2, OpenCV* `Research / GitHub`

- Real-time multi-modal threat identification across video and X-ray streams.
- Research-reported mAP@0.5 of **0.960** — first-author academic work.

Certifications & Traits

- FutureSkills Prime AI & ML (Gold) • NPTEL Operating Systems (Elite, Top 2%)
- IBM Data Science Professional Certificate • Google Cloud Vertex AI / Multimodal RAG
- Generative AI Essentials (Microsoft) • freeCodeCamp Responsive Web Design • Prompt Design in Vertex AI
- Soft skills: communication, collaboration, critical thinking, time management, adaptability, initiative

Curious by nature and disciplined by practice — thrives building meaningful tech in fast-paced environments.
